EDUCATION

Don Bosco Institute of Technology

Bachelor of Engineering in Information Technology; CGPA: 7.61 / 10

Mumbai, India

2021 – 2025

K. J. Somaiya College of Science and Commerce

Higher Secondary Certificate (HSC); 90.67%

Mumbai, India

2021

EXPERIENCE

Netcore Cloud

GTM Engineer

Mumbai, India

March 2026 – Present

- Design and build marketing-engineering automations on the Clay GTM platform to drive revenue
- Built automations for existing-contact verification and LinkedIn prospect discovery, sourcing prospect profiles directly from LinkedIn and reducing the team's manual research time by roughly 40%

Research & Automation Engineer Associate

October 2025 – March 2026

- Built a LinkedIn finder and scraper extracting up to 1,000 prospect and company profile links per run from event data (80–90% accuracy), eliminating hours of manual sourcing
- Created a WhatsApp validation tool verifying ~6,000 numbers per day across two lines, improving campaign deliverability while lowering costs
- Automated Apptopia scraping for MAU and tech-stack data across ~1,000 apps per day, and built a company LinkedIn-to-domain validation finder
- Delivered scrapers for Bharat Fintech Summit speaker data, G2 data for ISV accounts, and other targeted lead sources

Data Research Intern

June 2025 – October 2025

- Mastered the end-to-end manual research process (prospect collection, MAU scraping, LinkedIn sourcing, and ICP identification), surfacing the bottlenecks later eliminated through automation

PROJECTS

AI Voice Agent for Inbound Lead Qualification

n8n, Retell AI, Similarweb

- Built an n8n pipeline that picks up an inbound form fill within a minute, disqualifies non-ICP leads on B2C fit and Similarweb traffic, and triggers a Retell AI voice agent to call while intent is still hot, at ~\$0.02 per three-minute discovery call
- Agent books a meeting, warm-transfers with a whisper briefing, or logs the objection and the competitor named; a webhook workflow writes summary, sentiment, and current provider back to the sheet and creates a Google Meet invite

LinkedIn Prospect Verification Bot

Python, Selenium, OCR

- Automated the recurring six-monthly LinkedIn check of whether prospects are still active at their companies, scaling coverage from ~1,000 profiles per analyst per day to ~3,000 per day across parallel instances with no manual effort and keeping the prospect database continuously accurate

AI ICP Fit Scorer

Python, LLM

- Built an AI tool on Clay that scrapes a prospect's LinkedIn and scores ICP fit from designation and experience, flagging the right people to pitch ahead of a sales call and focusing rep time on high-probability leads

Champion Job-Change Signal Pipeline

Clay

- Used Clay signals to detect when a champion (C-suite or VP) moves to a new company and trigger a targeted promotional email, turning champion job changes into outbound opportunity

LEADERSHIP & ACTIVITIES

Computer Society of India (CSI), DBIT Student Chapter

Mumbai, India

Secretary

2023 – 2024

- Managed finances and administration for the student chapter, maintaining all financial records and member attendance

CERTIFICATIONS

- AI Builder: Create Agents, Voice Agents & Automations in n8n, Udemy
- Introduction to Model Context Protocol, Anthropic
- AI Fluency Framework & Foundations, Anthropic
- Agentic AI: A Framework for Planning and Execution, LinkedIn

SKILLS & INTERESTS

Technical: Python, Pandas, Selenium, Scrapy, Excel, Power BI, LLM and agent workflows (n8n), web scraping, Clay, Zapier, Salesforce

Interests: Building side-project automations; following new developments in AI, agents, and marketing technology
